Judy- Sorry – didn't get to this yesterday.

There was no call yesterday nor today. We may resume the calls tomorrow. Not sure yet. You are getting our updates right? I'll make sure you're on our list.

I sent your question to incident command. They are extremely busy so hopefully we can get you a response today.

Subject: Questions on Gold King

1.) Is there a conference call expected today? If so, what are the details?

2.) In yesterday's conference call, someone mentioned that the plume is still in New Mexico. How do we know that? How do we reconcile that with initial reports that the tip of the contamination was to reach Utah over the weekend, or by Monday at the latest? I requested an opportunity to ask that question on yesterday's conference call but was not called on. It's also a question that's been puzzling the Utah water-quality people too.

Thanks for any help you can provide.

Judy Fahys
